About Us

As a technologically advanced company, we, Innovative Engineering Works have been using cutting-edge technology to develop an innovative of products. We established ourselves as a manufacturer and supplier of various types of high-end machines & equipment in the year 2011. We use the most advanced industrial machinery in our facilities to manufacture products like Multi Head Liquid Filling Machine, SS Multi Mill Sieves Mesh, Lab Chocolate Coating Machine, Fruit Pulp Making Machine, Veterinary Bolus Tablet Press Machine, Fortified Rice Blending Machines, and so on. We have a highly skilled team that meticulously inspects all the manufactured goods as per the highest quality norms and only then ships them to the respective customers. In addition, we also provide repairing services but only after sales.

Why Us?

The following are some of the most crucial aspects that help to demonstrating why our company is the best option:

We adhere to the highest ethical standards when it comes to interacting with the clients.

We have a highly experienced team that always increases our productivity.

We have established cutting-edge machinery and equipment at our in-house manufacturing plant.

We ensure that only highest quality products are offered to the customers.

Our Team & Quality Standards

We are thankful to be supported with a knowledgeable and skilful team that always maintains the highest quality standards within the premises. Our team works diligently to manufacture the finest quality products such as SS Multi Mill Sieves Mesh, Fruit Pulp Making Machine, Fortified Rice Blending Machines, Multi Head Liquid Filling Machine, Lab Chocolate Coating Machine, Veterinary Bolus Tablet Press Machine, and many others. Another focus of our team is on ensuring that all products are packed in good quality material so that they are securely transported to the destination of customers.

Brands We Deal In

Innovative is the brand in which we deal.

Our Infrastructure & Manufacturing Unit

In our ultra-modern infrastructure, we have an in-house manufacturing unit which helps us in completing the always increasing demands of the customers. In the manufacturing unit, we have installed machines & equipment of latest technologies using which we develop a vast variety of products including Fruit Pulp Making Machine, Multi Head Liquid Filling Machine, Veterinary Bolus Tablet Press Machine, SS Multi Mill Sieves Mesh, Fortified Rice Blending Machines, Lab Chocolate Coating Machine, etc.
